The Environment

Mgr. Kateřina Trnečková

Outline of the presentation

- ▶ Ozone layer
 - ▶ Global warming
 - ▶ Pollution
 - ▶ Natural resources
 - ▶ Growing amount of waste
 - ▶ How to be green
 - ▶ You and the environment
 - ▶ Resources
- 

Ozone layer

- ▶ it protects all living things from harmful ultraviolet radiation (UV radiation damages our skin and may cause cancer)
- ▶ it is destructed and there are holes in it
- ▶ we should use aerosols that are ozone-friendly

Global warming

- ▶ the temperature of the earth increases
- ▶ it may cause droughts in some parts of the worlds and floods in others
- ▶ it is caused by greenhouse effect (carbon dioxide makes the earth warmer)

Pollution

- ▶ of air, water, soil
- ▶ big factories and cars, etc. produce harmful gases
- ▶ people use a lot of chemicals in the garden or at home, which pollute water and soil

Natural resources

- ▶ limited resources (oil, coal, gas) produce energy – they will not last for ever, they also harm the atmosphere
- ▶ we should use more renewable resources – water, air, solar energy

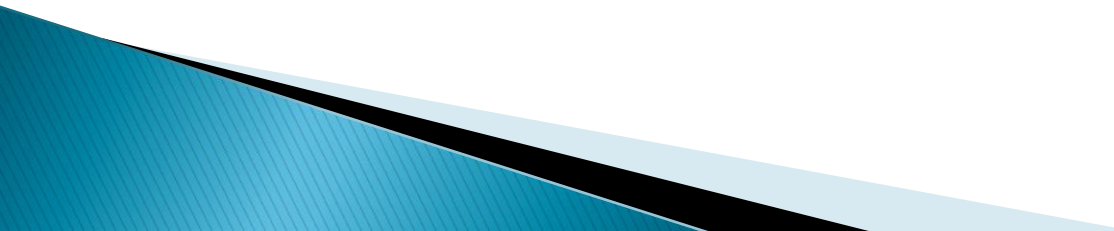

Growing amount of waste

- ▶ most of household waste is buried on land
- ▶ it could be recycled (used again), which saves energy and raw materials
- ▶ there are special banks / containers where people can sort glass, paper, plastic bottles, etc.

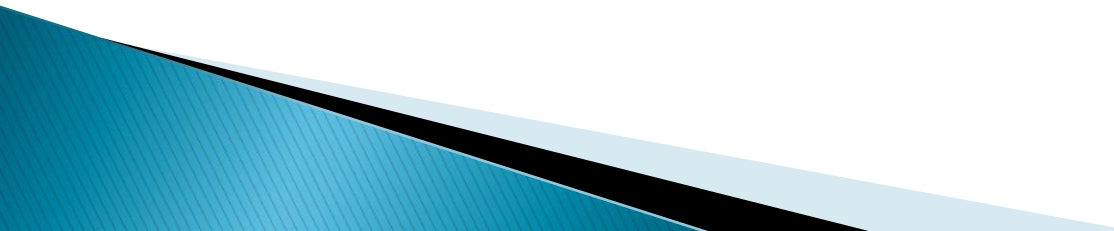

How to be green?

What can people do to protect the environment?

- ▶ Separate rubbish
 - ▶ Use recycled paper
 - ▶ Save energy
 - ▶ Use public transport or go on foot or by bike
 - ▶ Use reusable bags (not plastic)
 - ▶ Use less chemicals at home and in the garden
 - ▶ Others
- 

You and the environment

- ▶ Prepare a short speech (cca 3 minutes) in which you present how you and your family protect the environment.
 - ▶ You can also mention what don't you do and what should you start to do
-
