The **Freedom** Ship

Can you **imagine** a ship that is so big that it takes a quarter an hour to **walk** from one end to the other? At the moment it's just a plan, but the **designers** hope to start on it **soon** . It will be over 1,300 metres long, as **wide** as two football **pitches** and as high as a 25- **storey** building. It will **carry** 115,000 people. The ship in question is the **Freedom** ship. It will **sail** round the world **constantly** .

It will not be an **ordinary** ship, which just **provides** holidays or carries **goods** . People will **actually** live there. Companies will have their **offices** there, too. The ship will have everything that a normal city has – shopping **malls**, hotels, a library, a hospital and **schools**. There will be **plenty of** places for **entertainment**, too – a sports centre, multiplex cinemas, clubs, a park and a casino. The ship will also **pick up** satellite TV.

The ship will **even** have its own transport system on **board** . Because it will be so big, there will be cycle **tracks** and a small railway. The top **deck** of the ship will be a **runway** where small planes and helicopters will **land** and **take off**. At the back of the ship there will be a **marina** for smaller boats.

Why will people live there? The builders say that this will be more than a city on the ocean. It will be the perfect **society** . There won't be any **crime** . Will only rich people live there? Not **at all**, say builders. Like any city, it will need doctors, teachers, shop assistants, cleaners, plumbers and so on. It will be an international **society** with people from many countries. There will be people from different **religions** and social classes, too. They'll all live **together** happily on the **Freedom** Ship.
