

# Číslo materiálu: VY 32 INOVACE 25/18

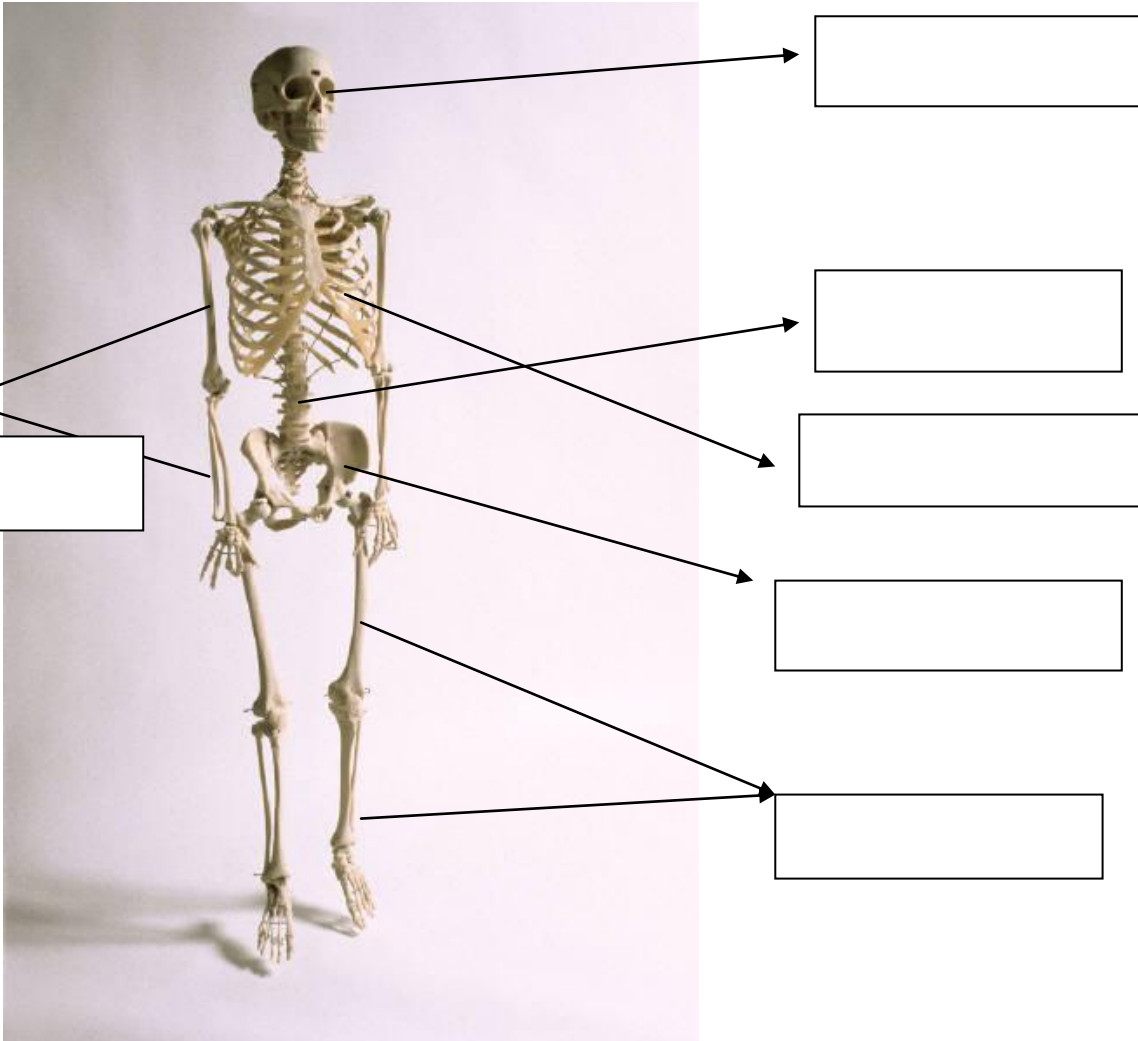

Název materiálu: Test - Anatomy 1 - 2

Číslo projektu: CZ.1.07/1.4.00/21.1486

Zpracoval: Jana Jourová

## Test - Anatomy 1 – 2

### 1. Describe the skeleton

### 2. Finish the sentences – choose the correct word:

All vertebrates have (tail/fins/skeleton).

Skeleton helps to move and protect the (organs/bones/hair).

Baby's body has 274 bones, but adults have only (106/506/206) bones, because some bones grew together.

At the age of (10/25/50) the process of growing is complete.

Skull protects the ( brain/heart/kidney).

(Pelvis/Spine/ribs) protects the spinal cord.

There are 12 pairs of (arms/fingers/ribs), that protect heart and lungs.

(Pelvis/spine/skull) protects abdominal organs.

3. Name 5 abdominal organs and translate them into your language:

---

---

---

---

---

---

4. Name 5 senses we have:

---

5. Explain these words:

Deaf – \_\_\_\_\_

Dumb – \_\_\_\_\_

Blind – \_\_\_\_\_

6. Describe human body:

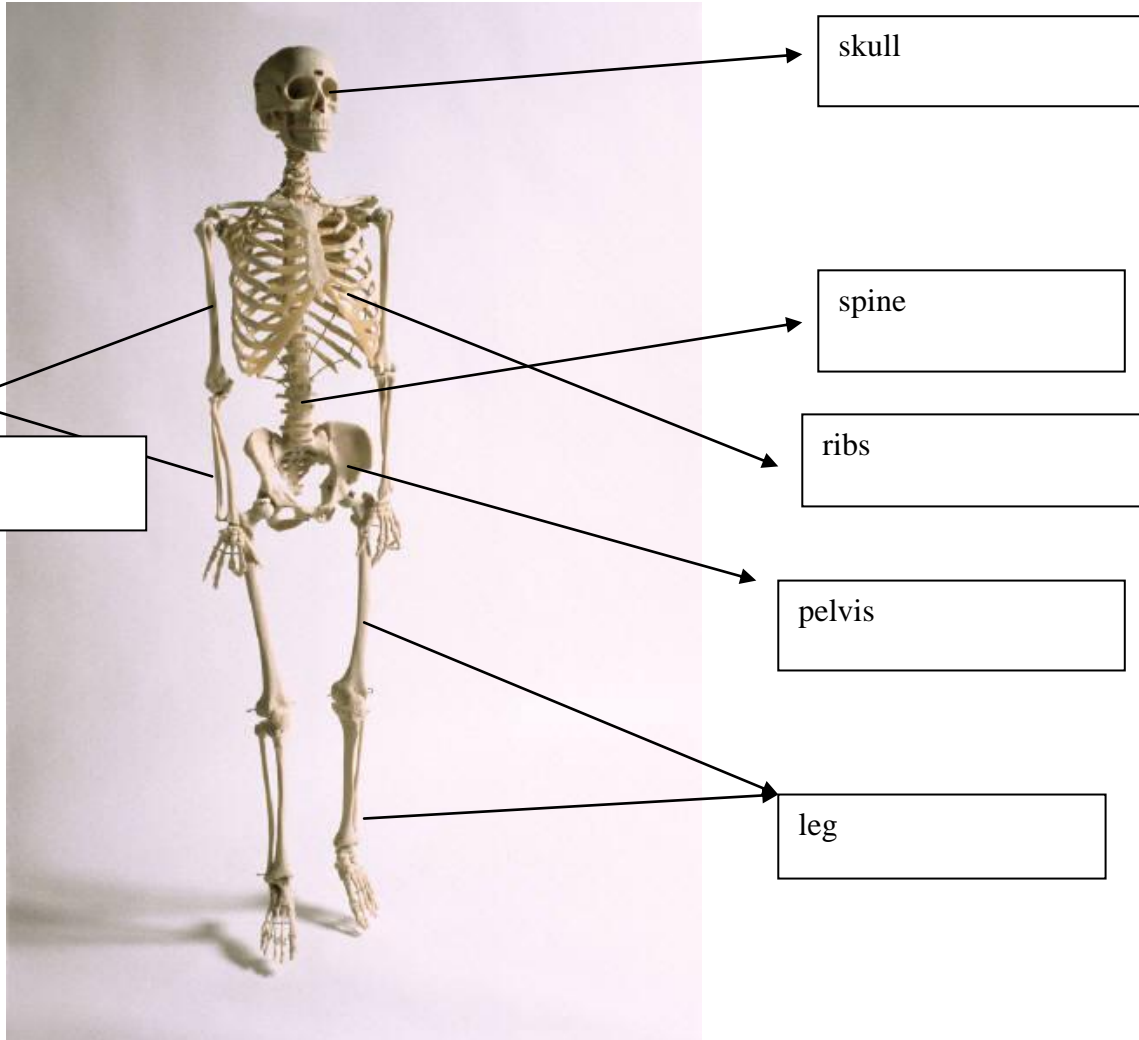

A group of young people in white shirts are forming a human pyramid with their hands. The image is used for a labeling exercise. Arrows point from boxes containing letters to specific body parts in the image:

- Box 'E' points to an ear.
- Box 'P' points to a nose.
- Box 'T' points to a tongue.
- Box 'C' (top right) points to a hand.
- Box 'C' (middle right) points to a hand.
- Box 'W' points to a wrist.
- Box 'F' points to a face.

## KEY - Test - Anatomy 1 – 2

### 1. Describe the skeleton

### 2. Finish the sentences – choose the correct word:

All vertebrates have (tail/fins/**skeleton**).

Skeleton helps to move and protect the (**organs**/bones/hair).

Baby's body has 274 bones, but adults have only (106/506/**206**) bones, because some bones grew together.

At the age of (10/**25**/50) the process of growing is complete.

Skull protects the ( **brain**/heart/kidney).

(Pelvis/**Spine**/ribs) protects the spinal cord.

There are 12 pairs of (arms/fingers/**ribs**), that protect heart and lungs.

(**Pelvis**/spine/skull) protects abdominal organs.

3. Name 5 abdominal organs and translate them into your language:

Heart – srdce

Kidney – ledvina

Brain – mozek

Intestine – střeva

Stomach – žaludek

Liver – játra

Lungs – plicina

4. Name 5 senses we have:

Taste, hear, see, smell, touch

5. Explain these words:

Deaf – People who can't hear.

Dumb – People who can't speak.

Blind – People who can't see.

6. Describe human body:
