Animal classification

1. Watch the presentation (Power Point DUM 25/02)
2. What animals did you see?

3. Now watch the whole presentation. Describe the animal's classes. Speak about them. Write new words in your vocabulary: lay eggs, warm blooded, scales, gills, wings, feathers, moist, fur, breathe, beak, lungs...)
4. With the help of presentation fill the table on the other side.
5. Read the text and choose the right animal:

a) I am a bird. I live near the sea or river. I eat fish. I am usually black and white. I love to follow fishing boats. I can make a big noise.

(parrot, seagull, peacock, eagle)

b) I am a mammal. I give birth to live youngs and I nurse them with milk. But I don't live on the land. I live in the ocean. I eat krill. I can be up to 30m long. I am the largest animal in the world.

(dolphin, shark, blue whale, turtle)

c) I am an amphibian. I live almost all over the world. I lay eggs that hatch into tadpoles. On the back of my head there are glands containing poison. When I am stressed I excrete that poison. I eat small animals such as spiders, earthworms, molluscs etc.

(salamander, toad, crocodile, turtle)

d) I am a reptile. I look very strange. I have the ability to change colours. My eyes are separately mobile and stereoscopic. It means that they can rotate separately and observe two different subjects. I have a very long tongue. The tongue hits the prey in about 30 thousandths of a second. I eat insects.

(lizard, salamander, chameleon, python)

e) I am a fish. I live in North Atlantic Ocean and Pacific Ocean. You can also find me in some great lakes of North America. I am born in fresh water, then I migrate to the ocean and I come back to fresh water to lay eggs. Unfortunately Grizzly bears love to catch me and eat me. My flesh is generally orange to red. People also love me on their table.

(salmon, carp, shark, whale)

6. Describe your favorite animal. Use some words you have learned.

Key - Animal classification

1. Watch the presentation (you tube)
2. What animals did you see?
Frog, penguin, fish, lion, lizard, birds, hummingbirds, whale, polar bear, elephant, jaguar, wolf, tortoise, turtle, snake, monitor
3. Now watch the whole presentation. Describe the animal's classes. Speak about them. Write new words in your vocabulary: lay eggs, warm blooded, scales, gills, wings, feathers, moist, fur, breathe, beak, lungs...)
4. With the help of presentation fill the table on the other side.
5. Read the text and choose the right animal:
 - f) I am a bird. I live near the sea or river. I eat fish. I am usually black and white. I love to follow fishing boats. I can make a big noise.
(parrot, **seagull**, peacock, eagle)
 - g) I am a mammal. I give birth to live youngs and I nurse them with milk. But I don't live on the land. I live in the ocean. I eat krill. I can be up to 30m long. I am the largest animal in the world.
(dolphin, shark, **blue whale**, turtle)
 - h) I am an amphibian. I live almost all over the world. I lay eggs that hatch into [tadpoles](#). On the back of my head there are glands containing poison. When I am stressed I excrete that poison. I eat small animals such as spiders, earthworms, molluscs etc.
(salamander, **toad**, crocodile, turtle)
 - i) I am a reptile. I look very strange. I have the ability to change colours. My eyes are separately mobile and [stereoscopic](#). It means that they can rotate separately and observe two different subjects. I have a very long tongue. The tongue hits the prey in about 30 thousandths of a second. I eat insects.
(lizard, salamander, **chameleon**, python)
 - j) I am a fish. I live in North Atlantic Ocean and Pacific Ocean. You can also find me in some great lakes of North America. I am born in fresh water, then I migrate to the ocean and I come back to fresh water to lay eggs. Unfortunately [Grizzly bears](#) love to catch me and eat me. My flesh is generally orange to red. People also love me on their table.
(**salmon**, carp, shark, whale)
6. Describe your favorite animal. Use some words you have learned.

Classifying Animals

	Fish	Amphibians	Reptiles	Birds	Mammals
Warm-blooded or Cold-blooded					
Type of Body Covering					
Live Birth or Hatched From Egg					
Feed Young with milk (Yes/No)					
Has a skeleton					
Breathe with Lungs or Gills					

KEY - Classifying Animals

	Fish	Amphibians	Reptiles	Birds	Mammals
Warm-blooded or Cold-blooded	cold	cold	cold	warm	warm
Type of Body Covering	scales	Moist smooth skin	scales	feathers	Skin fur
Live Birth or Hatched From Egg	eggs	eggs	Eggs, youngs	eggs	Live birth
Feed Young with milk (Yes/No)	no	no	no	no	yes
Has a skeleton	yes	yes	yes	yes	yes
Breathe with Lungs or Gills	gills	Gills and lungs	lungs	lungs	lungs
